PROJECT SOLUTIONS

ZENTRAC

ENGINEERED TO BE BUILT.

Company Profile

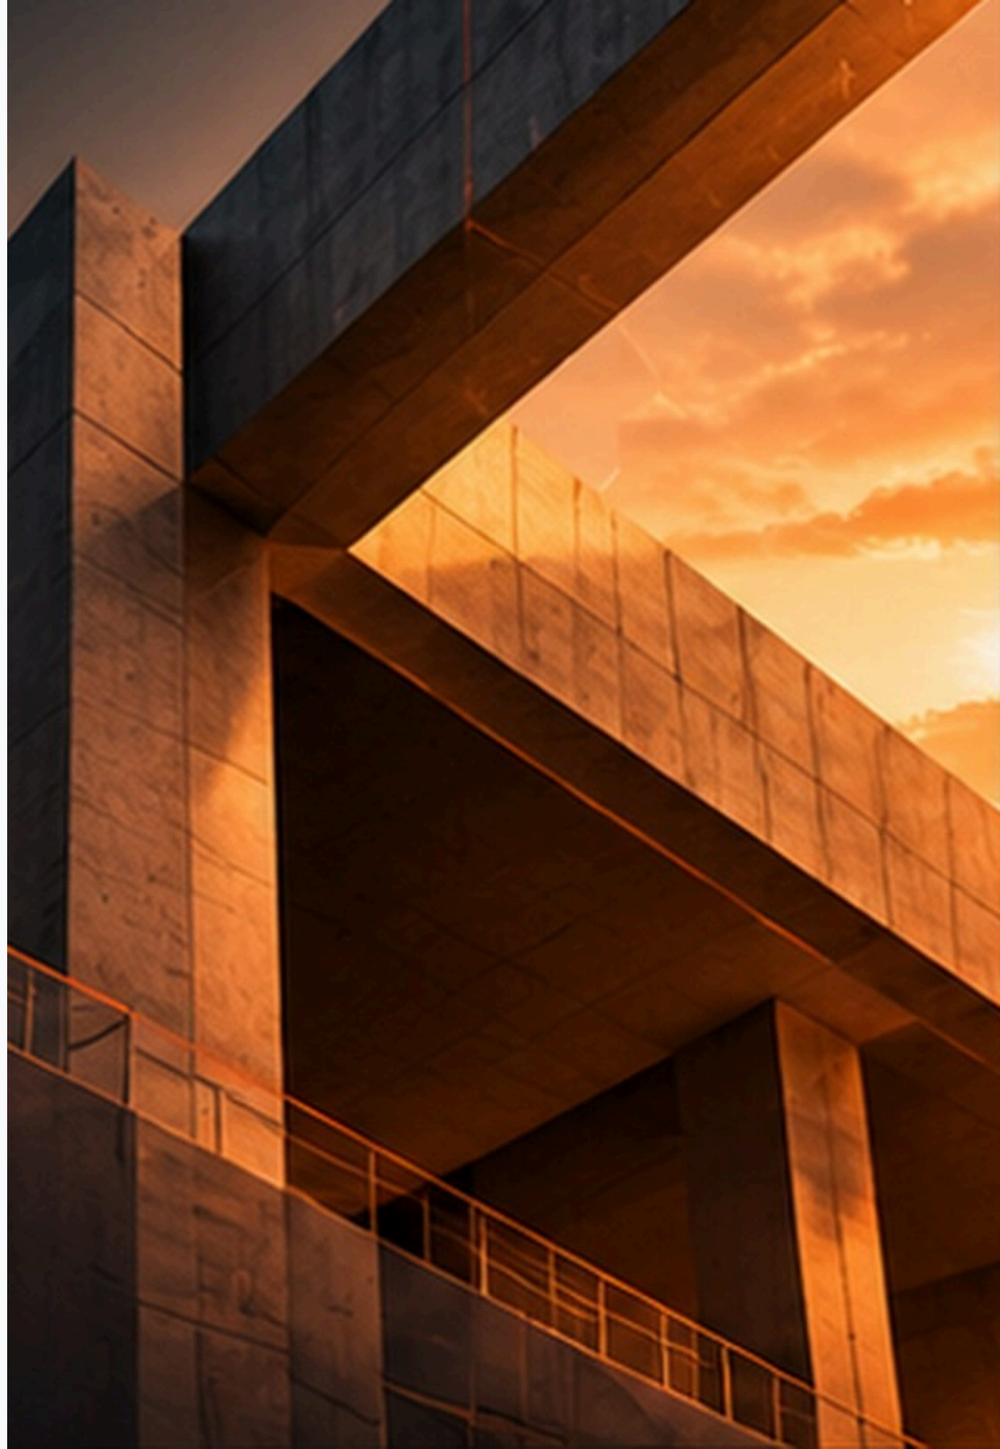

BUILDING A SMARTER TOMORROW

THE GAP

Every project is coordinated on paper.
Few are buildable on site.

Zentrac closes the gap between design and construction, before it reaches site.

THE COST

The most expensive place on any project is where design meets construction.

01 **Submittals come back.**

Shop drawings return with comments while the programme waits.

02 **RFIs pile up.**

Drawings contradict each other and the specification.

03 **Conflicts surface on site.**

Networks meet at excavation. Services clash at installation.

WHO WE ARE

Zentrac makes projects buildable.

An engineering and BIM consultancy for developers, contractors and consultants. We review, model and coordinate every scope we touch, and hand over work your site can build from.

8	13	3	11
Years on major projects	Projects	Countries	Networks

PROVEN ON

Our engineering runs beneath the region's landmark projects.

Utilities, roads and landscape across Saudi Arabia, Egypt and Rwanda.

AMAALA	SAUDI ARABIA
SEDRA	SAUDI ARABIA
Qiddiya	SAUDI ARABIA
King Salman Park	SAUDI ARABIA
King Fahd Sports City	SAUDI ARABIA
Dabaa	EGYPT

WHY ZENTRAC

Why teams hand us the hard part.

01

We engineer before we model.

Every scope starts with a buildability review. Gaps go back to you as RFIs, before work begins.

02

Coordinated before it is issued.

Clash detection on one federated model, with a clash log and RFI register on every issue.

03

Infrastructure is our home ground.

Eleven networks above and below the road, coordinated as one system.

04

Inside your team, to your standards.

Your BEP, your title block, your naming. We join at the station you need.

SERVICES

What we deliver.

Survey, Scan to BIM and AR with specialist partners.

01	**BIM Modelling**	Infrastructure, landscape and building disciplines to your BEP and LOD.
02	**Coordination**	Federation, clash detection and tracked clash resolution.
03	**Shop Drawings**	Coordinated shop drawings and combined services drawings from the model.
04	**Design Review**	Buildability review of incoming design, issues raised as RFIs.
05	**Quantities and As-built**	Model-based take-offs, as-built models and site support.

HOME GROUND

Eleven networks.
One system.

01 Water	02 Sewerage	03 Irrigation
04 Stormwater	05 Firefighting	06 LV / MV Power
07 Street Lighting	08 CCTV and Telecom	09 Roads
10 Landscape and Grading	11 Canals	

HOW WE WORK

The Zentrac Track.

Join at any station. What we receive is checked. What we hand over is ready for the next party.

01

Capture and Review

Existing conditions and a buildability review.

02

Model

Discipline models to the BEP and LOD.

03

Coordinate

Clash detection and a tracked clash log.

04

Extract

Shop drawings from the coordinated model.

05

Plan and Quantify

Model-based quantities and sequencing.

06

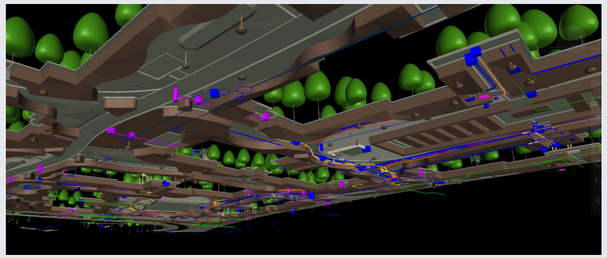

Support

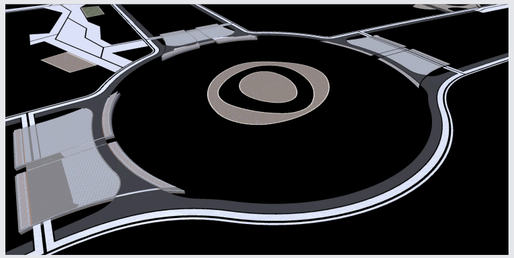

Site queries, updates and as-built.

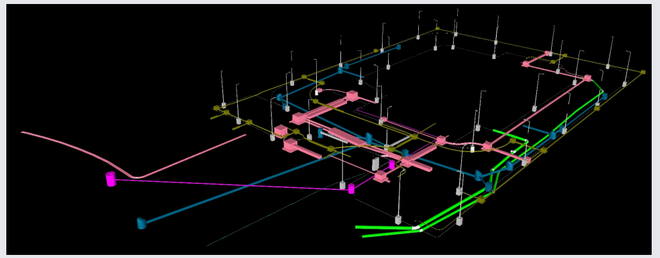

SELECTED PROJECTS

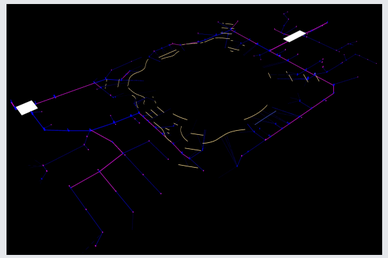

Proven where the stakes are highest.

Giga-projects in Saudi Arabia, national infrastructure in Egypt, city networks in Africa.

SAUDI ARABIA · RESIDENTIAL COMMUNITY

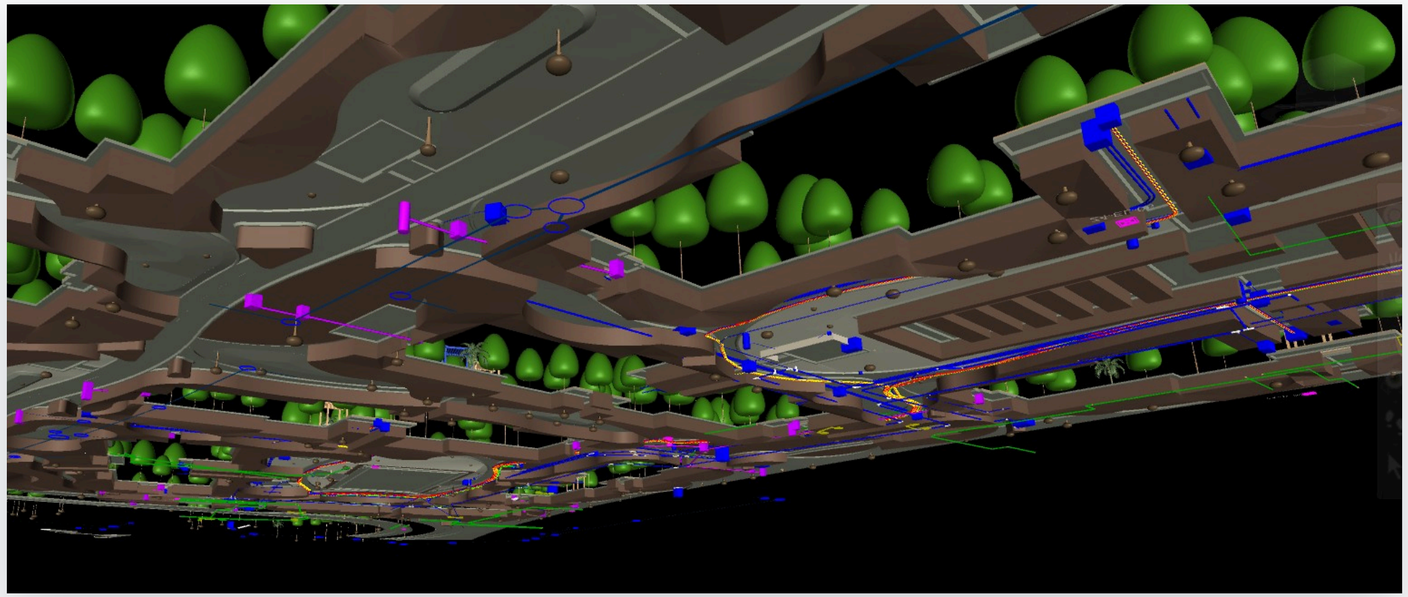

AMAALA Staff Village

Five utility networks. One coordinated model.

Zone 4 sewerage, irrigation, firefighting, water and LV networks, with surface grading and as-built models.

Sewerage | Irrigation | Firefighting | Water | LV | Grading | As-built

Developer · Red Sea Global

SAUDI ARABIA · RESIDENTIAL DEVELOPMENT

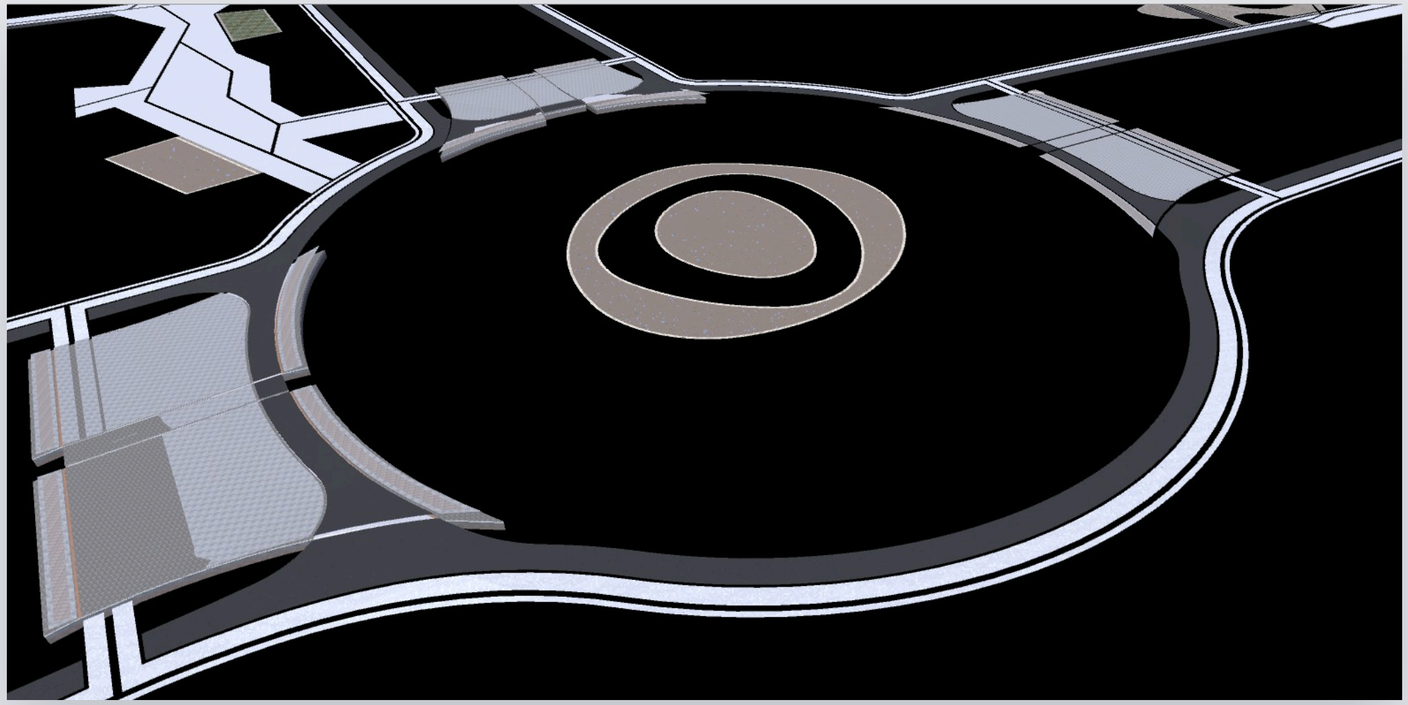

SEDRA

Landscape and utilities across four phases.

Landscape models and shop drawings for Phases 1B and 2. Utility modelling and coordination for Phases 3 and 4.

Landscape | Shop Drawings | Water | Sewerage | Irrigation | Stormwater | Power | Telecom

Developer · ROSHN

SAUDI ARABIA · URBAN INFRASTRUCTURE

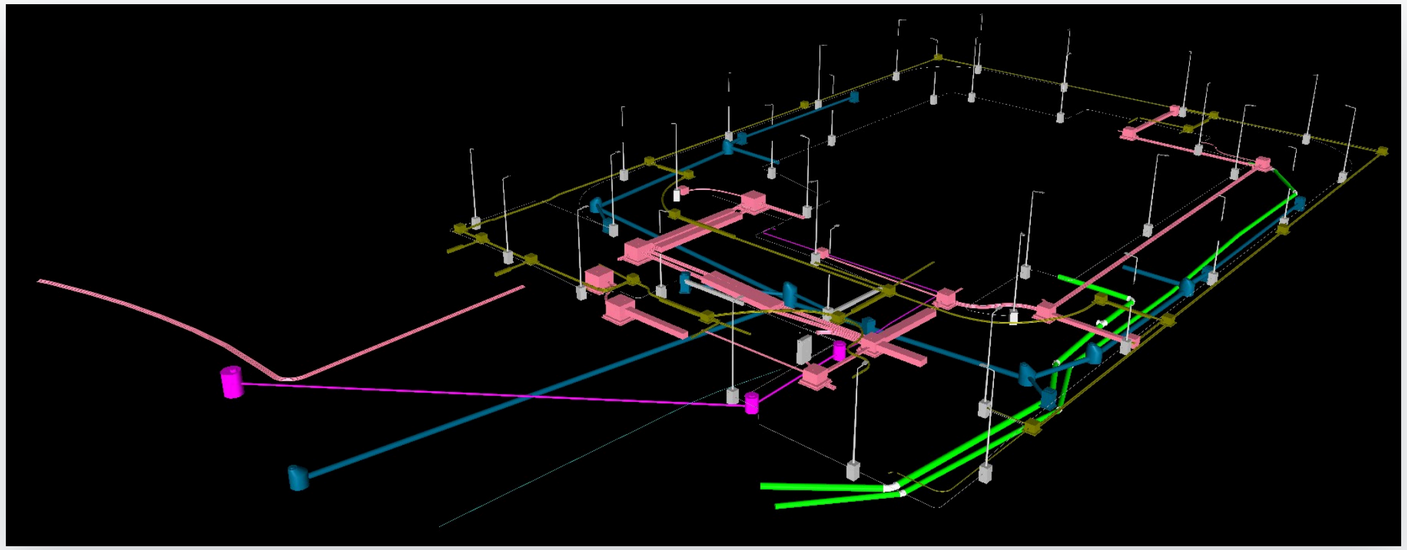

Qiddiya Resort Core

Roads, landscape and utilities as one.

Bulk utilities packages: modelling, coordination and shop drawings for roads, landscape and networks.

Roads | Landscape | Utilities | Coordination | Shop Drawings

Owner · Qiddiya Investment Company

SAUDI ARABIA · PARKS AND LANDSCAPE

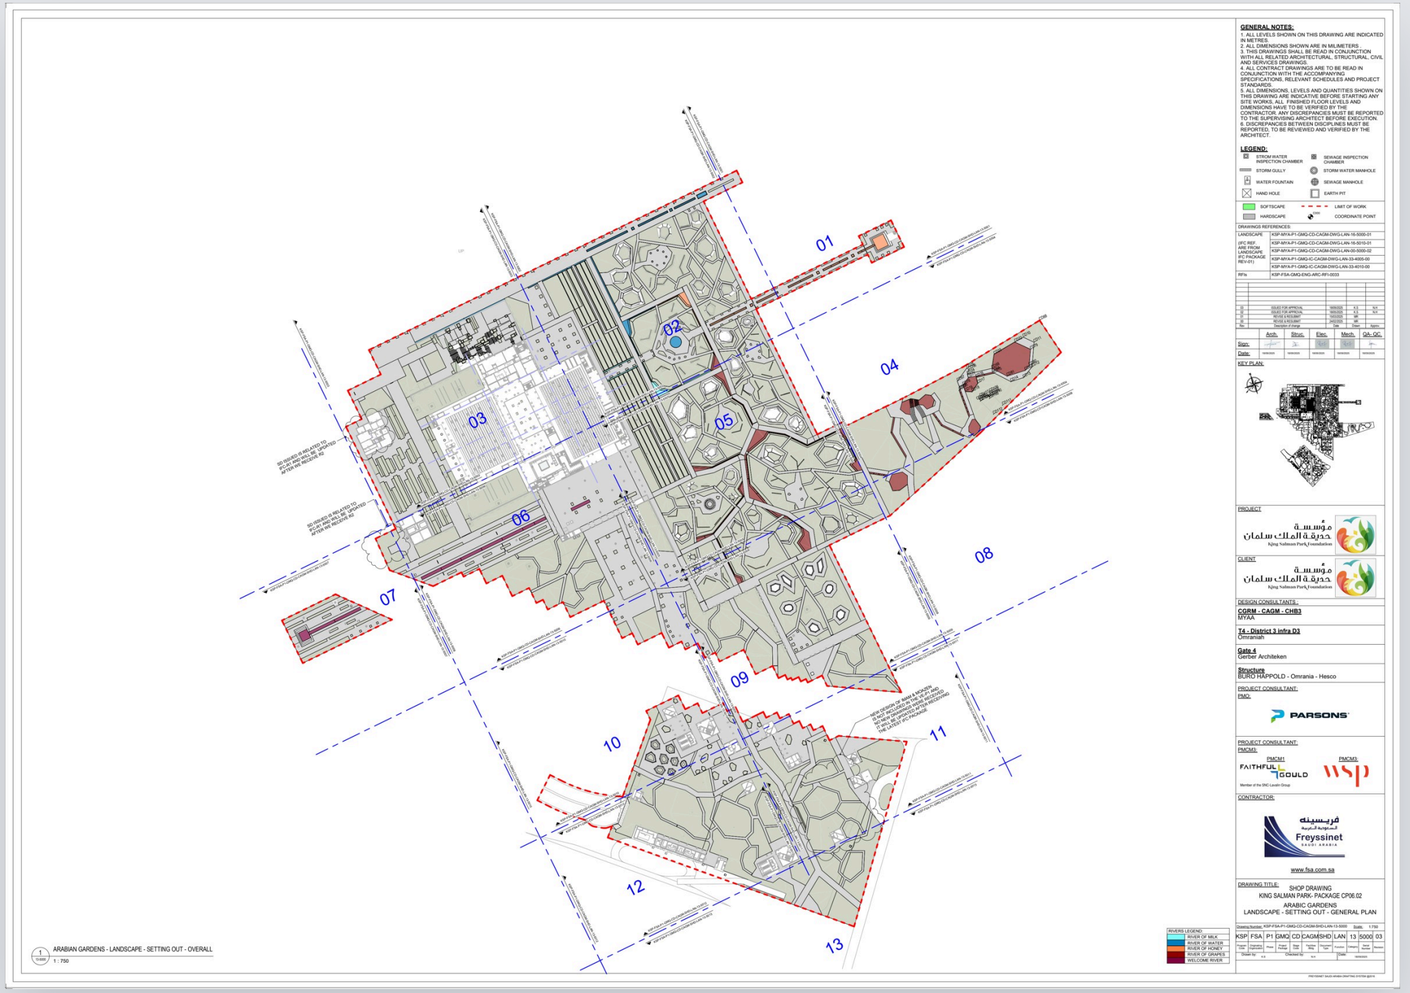

King Salman Park

Landscape BIM to LOD 400.

Arabian Gardens: landscape models and shop drawings for setting-out, grading and water features.

Landscape BIM | LOD 400 | Grading | Water Features

Owner · King Salman Park Foundation

SAUDI ARABIA · SPORTS VENUE

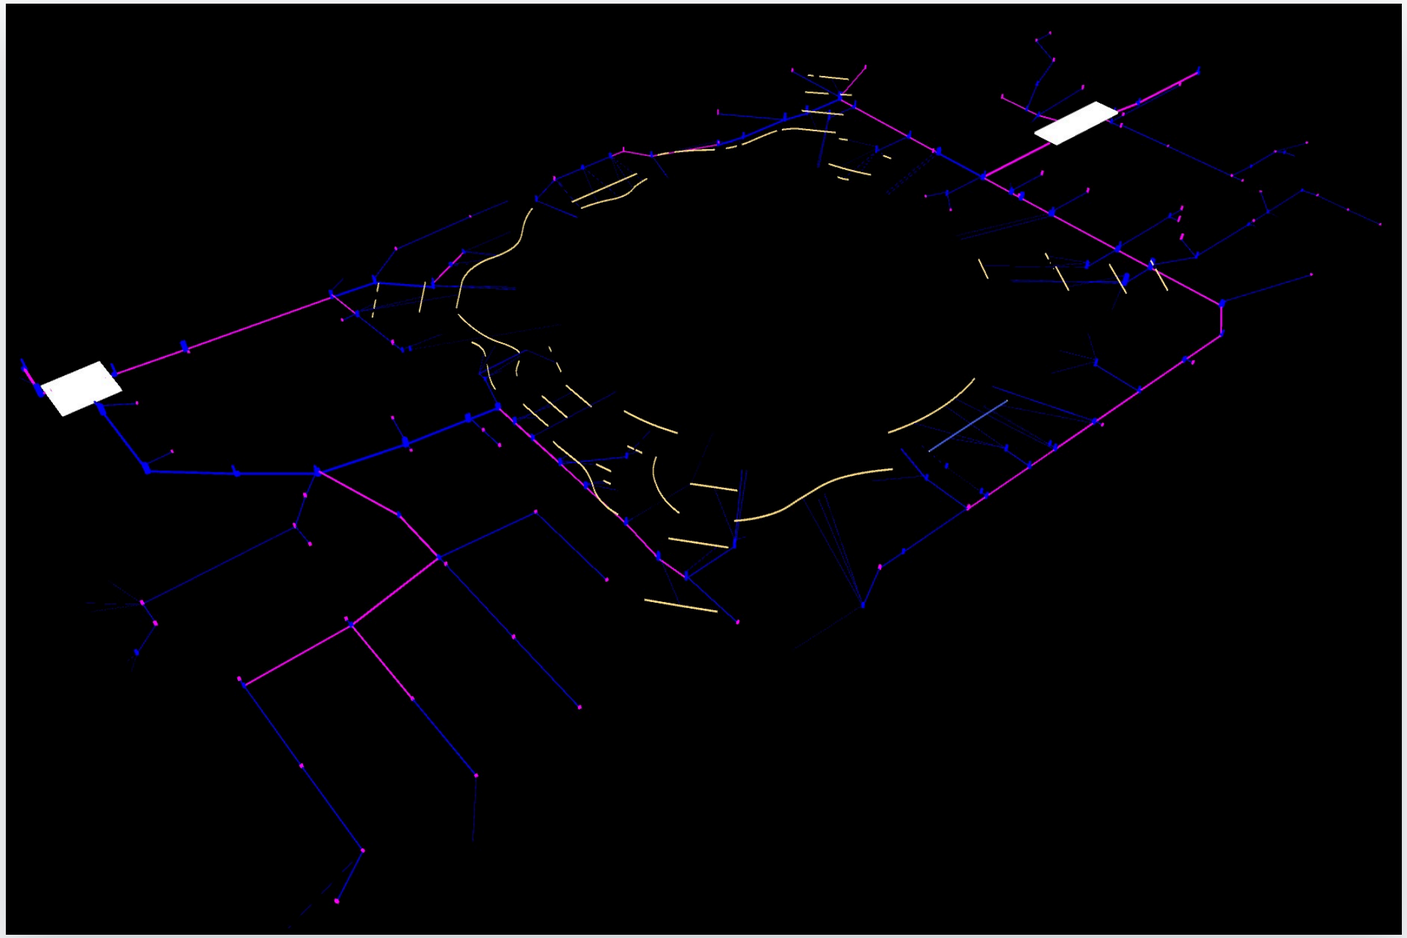

King Fahd Sports City

Stormwater for a national venue.

Stormwater network modelled and coordinated within the venue infrastructure package.

Stormwater | Modelling | Coordination

Riyadh
